

MAKE  
THEM  
UNIQUE

# Make them unique.

Thanks to the Creativity Engraving function, you can offer to your customers an exclusive service. You can realize totally customized lenses, marking what makes them truly unique: words, logos, drawings, initials, icons. Your customers' glasses will no longer be simple glasses. They will be the expression of their personality.

## With the MEI Creativity Engraving function you can:

### Upload an image

and mark it on the lens!

### Save a logo

and use it whenever you need it!

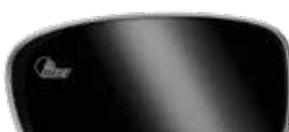

### Write on the lens choosing font and size!

Linear text or rounded to the corner? It's up to you!

### Resize and modify the logo and place it exactly where you want

Anchor and rotate it according to the edge or align it as you need.

### And yes... You can mark also on already cut lenses!
