Re-Sharpening

Quality & Saving: now 3X

MEI offers you the opportunity to **re-sharpen the PCD cutting tools 3 times** before replacing them, assuring **constant quality** over time and allowing you to **optimize costs**. This service is provided by specialized technicians working with **cutting edge technology** in a dedicated department. It is available 3 times only for the new tool bodies with an 'X3' mark on it.

Our re-sharpened PCD cutting tools are **guaranteed to provide edging precision** and **extend the life of the tool** so it performs as if it was new, using the settings recommended by MEI. This service is to provide the **best quality** and to avoid possible damage to the edger and its components.

Re-Sharpener

Zero compromise on quality

With the **MEI re-sharpening service** you will have all the advantages of the **MEI quality** and **costs always under control**.

All the **MEI locations worldwide** are ready to **quickly** offer this service to their customers.

Retipping

Performance and Cost Saving

With the **MEI Retipping** you can give your cutting tools a second life.

The **Retipping** consists of the opportunity (for specific tools and after a check by the MEI team) to re-use the tools' bodies and to replace the worn-out PCD, obtaining a completely new tool.

The process is made and 100% guaranteed by MEI.
